## Projects

### A status of Oral Submucous Fibrosis in Amravati Region

Oral cancer is a major health problem in some parts of the world,, especially in developing countries. Worldwide, the annual incidence exceeds 30,00,000 new cases.

OSMF is a chronic, premalignant condition of the oral mucosa which was first described by Schwartz (1952). Pindborg(1966) defined OSMF as "an insidious, chronic disease affecting any part of the oral cavity and sometimes the pharynx
