- **Salesforce Internship** – 6 Months From January 2022 to till date **Ceptra Infotech Pvt. Ltd., Nagpur**

CERTIFICATION: Certified as Salesforce Developer (PD-1 Certified)

Certified as Salesforce Administrator (Admin Certified)

PROJECTS During Internship:-

PROJECT-1
M.Tech Project :

- **Project Name : A Novel Approach To Detect And Prevent SQL Injection Attacks In Database Using Web Services**
Description : SQL injection is an attack methodology that targets the data residing in a database through the firewall that shields it. The attack takes advantage of poor input validation in code and website administration. SQL Injection Attacks occur when an attacker is able to insert a series of SQL statements in to a 'query' by manipulating user input data in to a web-based application, attacker can take advantages of web application programming security flaws and pass unexpected malicious SQL statements through a web application for execution by the backend Database. This project implemented a novel specification-based methodology for the detection and prevention of SQL injection Attacks.

Duration : One Year

PROJECT-2

- **Project Name:- Employee Leave Management System**

Role:- Salesforce Admin/Developer

PROJECT OVERVIEW:

Employee Leave Management System (ELMS) project provides a platform to automate all the employee leave activities where we can maintain all the data of employee, leave applications etc. Employee leave management system lets you enable the process of applying, sanctioning the leaves by Online way. Here whenever employee wish to apply for the leaves, he/she can apply through his/her registered account, the leave will be processed to the higher authorities for the approval As soon as the leave sanctions, it will be notified to the Employee Also employee management system keeps the track of leaves i.e how much leaves applied, sanctioned, balanced.

ROLES AND RESPONSIBILITIES:

- Customize and personalize Salesforce.com based on requirements.
- Created Objects, fields and Validation Rules wherever required.
- Worked on various salesforce.com standard objects like Accounts, Contacts andOpportunities.
- Maintain and developed the Custom objects, Custom fields, Custom tabs, and Validation rules.
- Worked on different page layouts and assigned them for different profiles to the users.
- Created Workflow Rules, Process Builder, Email Alerts to the needs of the application.
- Designed various Web Pages for functional needs within Salesforce Platform.
- Involved in creating action components based on client requirements.
- Involved in creating Batch Apex and Scheduling Apex classes based on the client requirements.Involved in field and record level Security.
- Have sent mail to particular users using Apex Trigger.
- Import & Export of the Bulk data through Data Loader.

PROJECT - 3

Project Name:- Online Winery Shop

Role:- Salesforce Admin/Developer

PROJECT OVERVIEW:

Online winery shop enable customer to browse the order and place the order to shop. There are two different ways BOPIS(Bye Online Pick up In Store) and BORIH(Bye Online receive in Home) for placing the order. After receiving the order, Administrator will approve the order on availability of stock and then approves the order and send the Email of order confirmation. Agenda of this project is , due to this COVID situation, those who want to place the order, they can place the order through this project. This project envisages the gap between customer and shop vendor

ROLES AND RESPONSIBILITIES:

- Customize and personalize Salesforce.com based on requirements.
- Created Objects, fields and Validation Rules wherever required.
- Worked on various salesforce.com standard objects like Accounts, Contacts andOpportunities.
- Maintain and developed the Custom objects, Custom fields, Custom tabs, and Validation rules.
- Worked on different page layouts and assigned them for different profiles to the users.
- Created Workflow Rules, Process Builder, Email Alerts to the needs of the application.
- Designed various Web Pages for functional needs within Salesforce Platform.
- Involved in creating action components based on client requirements.
- Involved in creating Batch Apex and Scheduling Apex classes based on the client requirements.Involved in field and record level Security.
- Have sent mail to particular users using Apex Trigger.
- Import & Export of the Bulk data through Data Loader.
